

## ARENA-HARROWS

*For Subcompact Tractors*

**RHE SERIES ARENA-HARROWS** are designed for subcompact tractors. They are ideal for horse arenas and racetrack applications. A low profile harrow that rotates in a crisscross fashion to provide complete harrow coverage. The unique turning action allows the harrow to level soil by redistributing it inward. Available in 4' and 5' diameter models for tractors with Category 1 Narrow, 3-point hitches. The 4 spoke rings are constructed of 1.5" round tubing and equipped with 5/8" x 7/8" x 8-1/2" bolt on replaceable teeth.
