Accessories

Hydraulic valve block

For forestry tong/grapple + leveller

Option if tractor only has:

1 double acting outlet.

or has:

1 single outlet and

1 back flow (max 45 L/min.)

One of the handles has integrated

"floating" position.

Pto shafts
Forestry chains
Distance pulley
Straps
Slider for cable

Since we are constantly innovating our designs, we reserve the right to making any technical changes !

HG-1200R

VHG-1200R

MADE IN
DENMARK

Grapple/tong for moving timber.

Wide opening makes it easy to grip the logs.

Opening width from 1200 mm to 2300 mm

1200 and 2300 models with hydraulic swing for more flexibility.

R models have a hydraulic rotator on grapple turns 360°

HZ-2300 & HG models have a standard 3-point hitch with storage box.

VHZ & VHG models incorporates a 3-ton forestry winch on the 3-point hitch.

Fransgård

Fransgård

Forestry tongs for any purpose

HZ-1500

Is the smallest forestry tong in Fransgård's wide range of forestry tongs. With a weight of only 132 kg and is it very suitable for small tractors.

Bronze bushings in all pivot points reduces wearing.

VHG-1200R and HG-1200R models have a rotator and large claw mounted.

The grapple will easily handle logs up to 20-30 mtr / 60/90 ft. The swing cylinder of the grapple must be connected to a float section of the tractor's hydraulic valve assembly.

All VHZ and VHG models include a 3-ton forestry winch on the 3-point hitch, which is operated by displacing the claw to the left and is activated manually by pulling the green power cord.

HZ-2300 and HG Models have a transport box built into the 3-point hitch. For cable slings and forestry chains etc.

HZ-2300 and HG Models have a lower link attachment point that makes it possible to tow logs with a cable sling or a forestry chain.
