Setting new standards!

# HAKKIPIILKE®

## Falcon

- FASTEST SPLITTING SPEED IN ITS SIZE CLASS
- SINGLE LEVER CONTROL
- QUICK HYDRAULIC OPERATIONS - NO V BELTS
- SAW CHAIN LUBRICATION WITH AN ADJUSTABLE PUMP

## NEW KIND OF POWER AND SPEED

The most recent addition to the Hakki Pilke product family is the Falcon firewood processor that resets all the standards of the field. The splitting speed of the Falcon is by far the fastest on the market in its size class and it is very easy to operate due to the single lever control. Due to the hydraulically operated saw and conveyor, the machine has no V belts. Safety and comfort are increased by a one-piece active safety cover.

The adjustable, hydraulically operated lubricating pump ensures the long service life of the saw chain and guide bar. The lubricating pump draws oil from a separate canister that is quick and tidy to replace. The open lower structure enables easy cleaning and the integrated toolbox keeps the tools in order. The extensive range of accessories allows the machine to be customised to suit your special needs.

Quick couplings for hydraulic accessories.

Handy toolbox.

Ergonomic control panel.

Powerful, hydraulically operated saw and adjustable saw chain lubricating pump.

### TECHNICAL SPECIFICATIONS FALCON

#### Features

- domestic use	•
- industrial use	•
Max. log diameter	350 mm
Wood cutting length	250–500 mm
Chain saw, blade length	16 "
Saw chain	1.5 mm, 67 links
Splitting force	4.2 and 7 t

#### Power source

Tractor/electric motor	•
Electric motor	7.5 kW
Power consumption	20 hp
Fuse size	20 A

#### Machine dimensions in the transport position

Height	2,530 mm
Width	2,550 mm
Length	1,250 mm
Weight (tractor driven with accessories)	870 kg
Output conveyor length	4 m

#### Splitting blades

2/4	•
6	•
Height adjustment	Manual

#### Accessories:

- Splitting blade to 6 sections
- Cleaning output conveyor
- Adjustment of the conveyor rotation speed
- Additional hydraulics set for accessory equipment
- Additional hydraulics set for the feed table
- Log guide metal plate instead of the guide rollers
- Log lift and log tables
