

## TRASH FORKS

**TRASH FORKS** are a handy tool that will make moving tree branches and other debris an easy task. A loader bucket is great for moving soil, but handling trash is a problem. Purchasing a separate trash fork bucket is costly and can be troublesome to mount. An investment in these new quick on and off *Clamp-On Trash Forks* will increase your front end loader's versatility.

#### FEATURES:

- Two heavy screw-lock clamp brackets with handles
- 2" square, 1/4" wall tubing by 20" long tines
- Clamps fit deep into the bucket for added strength
- Clamping brackets placed near the bucket side plates for added strength
