Self Contained 3215 electric powered Two-Way Log Splitter

A cleaner and quieter option for splitting wood. Powered by a 120 Volt / 15Amp high torque electric motor, the 3215 is an 18 ton log splitter with a quick cycle time!

The 3215 is modeled after Split-Fire’s popular 3255 bi-directional log splitter introduced to the rental market 30 years ago. Like all Split-Fire log splitters the 3215 features a unique 2-way splitting action from the knife which splits wood in both directions.

Rated for logs between 30” - 36” in diameter, the model 3215 features Split-Fire’s unique log stop design that prevents dangerous “fly-outs” when splitting knotted hardwoods.

It plugs into a regular household 120 volt wall outlet without the need for high amperage circuit breakers. It is a “green alternative” for customers who can now split wood indoors without the noise and emissions from a gas powered engine.

Quality Built for High performance! Split-Fire log splitters give you trouble free log splitting for years to come!

Model 3215

Frame	6" x 6" steel tube	Overall Width	40"
Log Capacity	30" - 36" diameter	Overall Length	84"
Tonnage	18 tons splitting force	Overall Height	34"
Production Volume	50 cord per year +	Weight	440 lbs
Cycle Speed	16-17 seconds	Bed Height	24"
Power Source	120 Volt / 15 Amp	Knife Height (+/- 1/4")	8"
Pump	7 GPM low pressure 1.8 GPM high pressure	Cylinder Size	3.5" x 24"
Reservoir	12.5 L	Tire Size	4.80" x 8"
Stroke Length	24"	Standard Hitch Size	2" ball coupler

QUALITY BUILT FOR HIGH PERFORMANCE!
