

# SPLIT-FIRE®

## Wood Chipper Self-Propelled

Split-Fire manufactures a line of heavy duty 5 inch wood chippers designed for continuous heavy duty use. Built to last, these high-performance, self-feeding wood chippers pull in untrimmed branches, green leaves and stringy wood to produce consistent 1/2 to 3/4 inch wood chips. The low parts count, heavy duty clutch, dual belt system and powder coated finish reduces maintenance issues as these machines do not require annual overhauls. Equipped with a heavy duty torsion axel rated for 1400lbs, they can be towed on and off-road.

- Compact design to easily access confined areas.
- Elongated hopper prevents accidental contact with blades.
- Extra plate steel around blade box prevents blades from exiting if fed prohibited materials.
- Anti-plugging design, 2-sided knives and adjustable bed-blade for added performance.
- Powered by GX Series Honda Engines.

## Quality Built for High Performance

Model	4013	4020	4024
Frame	5/16" & 3/8" Plate Steel		
Overall Width	48"		
Overall Length	94"		
Overall Height	72"		
Max Diameter	5"		
Chip Size	1/2" - 3/4"		
Rotor Diameter	20 7/8"		
Rotor Weight	140 lbs		
Self-Feeding	Yes		
Finish	Powder coated		
Knives	2 double sided blades 7 1/4" x 20 3/4" x 7/16"		
Infeed Hopper Dimension	26" x 20 3/4" x 3 1/2'		
Hitch Size	2" Ball		
Bed Knife	Adjustable		
Final Drive	Centrifugal Clutch - dual belt system		
Suspension	1400 lbs per axel		
Weight	650 lbs	700 lbs	
Power Source	GX 390 Honda	GX 630 V-twin Honda	GX 690 V-twin Honda
Starting	Recoil	Electric

# SPLIT-FIRE®

## 3 Point Hitch PTO Wood Chippers

Split-Fire manufactures a line of heavy duty 3 Point-Hitch PTO wood chippers designed for tractors rated at 20 hp or more. Available in either 2-blade or 3-blade configurations, these high performance, self-feeding wood chippers take in un-trimmed branches up to 5 inches in diameter! They are commercial grade machines designed for continuous use producing a consistent chip size of 1/2 to 3/4 inch. The 3-point-hitch wood chippers are equipped with a heavy duty gear box without a clutch and belts to keep maintenance low and feature high speed rotors with an adjustable bed knife.

- Compact design to easily access confined areas.
- Elongated hopper prevents accidental contact with blades.
- Extra plate steel around blade box prevents blades from exiting if fed prohibited materials.
- Anti-plugging design, 2-sided knives and adjustable bed knife for added performance.
- Side-facing feed hopper for easy chipping along fencelines.

## Quality Built for High Performance

Model	4003
Frame	5/16" & 3/8" Plate Steel
Overall Width	44"
Overall Length	42 1/2"
Overall Height	63"
Max Diameter	5"
Chip Size	1/2" – 3/4"
Rotor Diameter	20 7/8"
Rotor Weight	140 lbs
Self-Feeding	Yes
Finish	Powder coated
Knives	2/3 double sided blades 7 1/4" x 20 3/4" x 7/16"
Infeed Hopper Dimension	26" x 20 3/4" x 3 1/2'
Hitch Size	3pt Category 1
Bed Knife	Adjustable
Final Drive	PTO with gearbox
Weight	500 lbs
Power Source	20-80hp PTO (2-blade) 80 + hp PTO (3-blade)
3-Blade option	Yes
