# Cargo Silage/ Grain Dump Trailers

▶ North American made,  
▶ with a European touch on design and finish.

## TAPERED BODY

Tapered body: Helps to reduce the drag on the walls when dumping, the load ejects easier and at a lower height than straight walls.

## SINGLE MULTISTAGE CYLINDER

Single, Multi-stage dump cylinder: Requires less oil from the tractor, accommodating older, smaller tractors with limited oil capacity.

## NORTH AMERICAN AXLES / HIGHWAY TRUCK BRAKES

North American axles / Highway truck brakes: Makes spare wheels and axle/brake parts easier to find. Removable stub axles for any major repairs.

## DROP DOWN SIDE EXTENTIONS

Drop down extensions: Makes the trailer a true multi-use machine, switch from hauling silage to manure/grain etc in a few minutes.

## ADJUSTABLE RUBBER RIDE HITCH

Adjustable rubber ride hitch: Reduces jumping on the hitch through rough ground or at speed.

## ROAD LIGHT KIT, FENDERS & MUDFLAPS

## SWIVEL BALL HITCH

## HYDRAULIC JACK
