

Fransgård

V-4000 / V-6500 Radio operated winch

Clutch active

Clutch de-active

This is the newest machine in the Fransgård forestry range. Fransgård is now offering a cheaper radio controlled winch. The winch is a standard latch brake winch added with an electric spindle. It is very comfortable operating the winch. Important: the brake is NOT operated by the remote control. This must still be done manually.

- **Radio controlled winch**
- **Comfortable operating**
- **Technical data like in latch brake leaflet**
- **Including spindle**
- **Including remote controlled – working range app. 75 meter/246 feet depending on interference**
