

Fransgård SK – Forest grapple

SK-950
SK-1400

Made in Denmark

- Large loader-bracket mounted hydraulic claw for moving timber.
- The claw has a wide opening, allowing easier grasping of the timber.
- Strong and sturdy hydraulic cylinder which holds timber securely.
- Opening width 950 mm - 44" to 1400 mm - 59".
- Offered with Euro, SMS or universal skid steer bolt on mounting brackets.
- The gripper arm serves as a parking stand, when it is closed completely.
- The grapple is produced from high quality Domex 420 steel.

Fransgård

Fransgård Maskinfabrik A/S
9640 Farsø, Denmark www.fransgard.dk

The upper arm securely holds the timber against the long forks, even if the middle grip is not tight

The large opening height of the upper arm and long forks allows grasping a large volume of timber.

Bolt-on SMS, EURO or universal skid steer mounts are optional

The grip claw is easily and safely stored when the gripper arm is completely closed, functioning as a kickstand.

Oilite bronze bushing at pivot points
