Skid Steer - Mounted

SKID STEER- MOUNTED STUMPBUSTERS

Shaver's hydraulically powered StumpBuster is the choice for large contractors, landscapers and maintenance departments. Mounted on a skid steer loader, these units are easy to maneuver into compact areas that are impossible to reach with other types of machines. They feature the ideal combination of maneuverability, power, durability and simplicity.

SC-30H

The SC-30H's wheel features carbide steel teeth that aggressively grind stumps down to 10 inches below ground. The unit features a 24 inch cutting wheel that rotates at a speed of 1200 rpm at 25 gpm. The SC-30H is simply the most compact, powerful and nimble unit on the market.

MANEUVERABILITY

With skid steer loader maneuverability, stumps can no longer hide next to buildings, storage sheds, fence rows, hillsides or sidewalks. The hydraulic StumpBuster is ideal for landscaping contractors and builders looking to remove one or even dozens of stumps. The hydraulically powered cutter eliminates any type of stump, tall or short, hardwood or soft, without the need to reposition the unit. And, because it's mounted on a skid steer loader, the user has improved front-end visibility to quickly maneuver around even the biggest stumps up to 2' high – or clean up a whole grove in no time.

POWER

The StumpBuster's hydraulic motor powers the ¾ inch thick steel cutting wheel, easily turning the hardest wood into fine mulch.

DURABILITY

Carbide steel teeth aggressively chew through any size stump with little wear. Single-direction cutting puts less stress on the bearings and gear box. Heavy-duty bearings also ride in an oil bath, virtually eliminating friction wear.

SIMPLICITY

Shaver's Quick-Tach system allows the operator to hook up quickly and get to work. Hydraulic hoses are standard sizes for easy repair or replacement. Teeth are easy to access and replace using a standard wrench size.

Description	Specification
Weight	650 lbs
Cutting Wheel Diameter	24 inches
Cutting Wheel Speed	1200 rpm
Hub Torque	140 ft lbs
Required Power Source	16 Min. - 30 GPM
Cutting Teeth	23 carbide steel teeth
Maximum Cutting Depth	10 inches

Shaver Manufacturing is a leading manufacturer of fencing equipment. We manufacture a complete lineup of post drivers, post hole diggers, stump grinders and log splitters. We're proud of the fact that our equipment is made in the Heartland of America – Graettinger, Iowa.
