# STEP UP

## An exciting new system for your pickup

2007 Grand prize  
winner of the  
Minnesota  
Inventors Congress

Tired of crawling on your knees to get into your pickup box? Now you don't have to with the new step up system!!

Pull the spring loaded pins. Swing the step-up system out and it locks into place. This provides a safe, secure, non-slip step to get into your pickup box with the tailgate down

Close the tail gate, pull the spring loaded pins, swing the steps back and they lock into place. Providing a step on either side of the box.

Takes only seconds.

Fits virtually all 2" receivers regardless of make, model or year of pickup.

Powder painted in black.

300 lb. load limit.

*In some instances it may be necessary  
to relocate electrical outlet.*

*Easy installation*

*No assembly or holes to drill*

# STEP UP

## The Ultimate in pickup steps

We provide a 8x17 step. Pull the spring loaded pins, swinging the steps back. They lock in place automatically providing you with the largest step in the industry.

We provide a perforated non-slip 8x8 step from both sides of the back of the pickup.

Step Up does not interfere with your receiver in any way. You can use it with a draw bar, ball hitch or insert we provide. It can be transferred to any pickup with a 2" receiver regardless of make, model or year of pickup.

The large steps are an excellent and convenient step for loading or unloading when the tailgate is down.
