## Multivator Cultivator

### Model FL

Model FL Multivator is a lighter series machine designed for tractors under 50 horsepower. Due to the compact nature of the design, this model works very well with sub-compact tractors. The ground clearance under the hex drive bar is 16".

A complete Multivator is made up of a frame assembly, a number of tillage heads, PTO shaft and optional equipment as required. To price out a complete Multivator add the price of the frame, PTO shaft and tillage heads together.

Frame assemblies comprise the main toolbar; hex drive bar; gauge wheels; 540 rpm gearbox; three point hitch.

Standard equipment includes: steel gauge wheels; 4 blades per flange  
FL tillage heads use #60 roller chain in an oil-bath chaincase

### FL Frame Assemblies

## Multivator Cultivators

### Model FP

Model FP Multivators are medium series machines, for 25-100 HP tractors. They are suited for larger vegetable farms, strawberry renovation, nurseries and field crops.

A complete Multivator is made up of a frame assembly, a number of tillage heads, PTO shaft and optional equipment as required. To price out a complete Multivator, add the price of the frame, PTO shaft and tillage heads together

Frame assemblies comprise the main toolbar; hex drive bar; gauge wheels; 540 rpm gearbox; three point hitch.

Standard equipment includes: steel gauge wheels; 4 blades per flange. FP tillage heads use #80 roller chain in an oil-bath chaincase. Ground clearance under the hex drive shaft is 20".

### FP Frame Assemblies

Item Number	Model	Frame Width (in.)	Ground Clearance	Weight (lbs.)	List Price FOB OH
M520320011	FP	66"	20"	378	\$3,950
M520320012	FP	90"	20"	417	\$4,125

## Multivator Cultivators

### Model FPA and FPXA (high clearance models)

Model FPA and FPXA Multivators are medium series machines, with higher ground clearance than the standard FP.

They are recommended for applications such as nursery crops and ornamental grasses, where the crop is taller.

A complete Multivator is made up of a frame assembly, a number of tillage heads, PTO shaft and optional equipment as required. To price out a complete Multivator, add the price of the frame, PTO shaft and tillage heads together. Frame assemblies comprise the main toolbar; hex drive bar; gauge wheels; 540 rpm gearbox; three point hitch.

Standard equipment includes: steel gauge wheels; 4 blades per flange.

FP tillage heads use #80 roller chain in an oil-bath chaincase.

Ground clearance under the hex drive shaft is 25" on FPA; 32" on FPXA

### FPA/FPXA Frame Assemblies
