MK 80 Swing Hopper Augers w/rims & tires

MK80 mechanical swing hopper auger runs both the main and swing auger w/PTO power.

This design maintains high capacity and performance. "A" frame design for maximum stability. Equipped with HD constant velocity (CV) PTO shaft to eliminate vibrations for smoother running and less stress on the drive train.

Shipped complete with shielded CV-PTO driveline equipped with overload shear bolt, hydraulic lift cylinder with hose and shut-off valve, complete with drive, hopper lift system with 5:1 winch, intake boot hopper with tow bar and hitch jack, and tractor-end hydraulic couplers. 15" radial tires mounted on rims. Hoses for the hydraulic motor on hydraulic drive hoppers are included LESS the tractor-end hyd couplers.

Transport Augers

Contact JSW for freight cost to New England states.

MKX 100 Swing Hopper Augers w/rims & tires

Introducing the MKX 100 series which offers unmatched dependability and serviceability.

- improved low-profile hopper w/easy to access drive components and u-joints with external grease zerks for ease of maintenance.
- sealed spout and boot with improved access panels and clean out
- increased capacity up to 6,600 BPH
- square shaft flighting connections with removable and replaceable boot flight.
- Wear Edge: continuous 10ga steel ribbon welded to flighting edge where most of the wear occurs. Standard on all augers at critical grain transfer points, including hopper, boot and incline tube.
- Extendable axle on the 83' length for increased stability. Retraction offers reduced width for transportation.

Shipped complete with shielded CV-PTO driveline, equipped with overload shear bolt, hydraulic lift cylinder with hose and shut-off valve, standard or low-profile feed hopper (as ordered) complete with drive, hopper lift system with 5:1 winch, intake boot hopper with low bar and hitch jack, and tractor-end hydraulic couplers. Shipped w/15" tires mounted on rims.

- MKX 100 x 83' augers are shipped with 6-bolt cast iron hubs and 16" heavy gauge wheel
- when ordering - specify desired drive and hopper style
- if not specified - auger will be shipped with the low profile hopper

MKX 130 Swing Hopper Augers w/rims & tires

- capacity of 11,000 at all elevations
- improved low-profile hopper w/easy to access drive components and u-joints with external grease zerks for ease of maintenance.
- sealed spout and boot with improved access panels and clean out
- square shaft flighting connections with removable and replaceable boot flight.
- 84', 94', 114' sizes use steel trussing on the top of the auger for stability & durability
- 84', 94', 114' sizes offer extendable axles for stability at the bin site and narrower transport width

Shipped complete with shielded CV-PTO driveline, equipped with overload shear bolt(s), dual hydraulic lift cylinders with improved shut-off valve, hopper lift system with 5:1 winch. 16" tires mounted on rims are standard. Includes hydraulic tractor-end couplers.

MKX 130 Reducer Reverser (recommended for 1000rpm tractors)

Allows higher HP tractors to use the 1000rpm PTO outlet to operate the MKX130 augers at an optimal speed of 540rpm and **maximize the auger capacity**. Dual inputs allow auger direction to be easily reversed by switching PTO input connection. Units mounts conveniently on auger boot. (NOT compatible with MK80, MK100, or older MK130 model augers, NOT compatible with augers equipped with Right Angle Drive.
